

ANAS MANSOORI

Senior Android Developer | Kotlin | Jetpack Compose

Noida, Uttar Pradesh | +917619983037 | anasmansoori734@gmail.com

[LinkedIn](#) | [Portfolio](#) | Immediate Joiner

PROFESSIONAL PROFILE

Senior Android Developer with 6+ years of experience building scalable, secure, and high-performance mobile applications using Kotlin, Java, Jetpack Compose, and RxJava. Experienced in MVVM, Clean Architecture, modular architecture, offline-first development, fintech payments, Mobile POS, NGO survey platforms, and OTT applications. Delivered measurable improvements in crash rate, transaction reliability, API performance, and development efficiency while mentoring developers and collaborating across product, backend, and QA teams.

CORE TECHNOLOGIES

Android: Kotlin, Java, Android SDK, Jetpack Compose, XML, Android Architecture Components

Architecture: MVVM, Clean Architecture, modular architecture, offline-first architecture

Data and Async: Coroutines, Flow, RxJava, Room, Firebase, Retrofit, REST APIs, JSON

Specialized: Payment gateways, Bluetooth/Wi-Fi integration, ExoPlayer, performance optimization, Git, Gradle, Play Store deployment

PROFESSIONAL EXPERIENCE

Senior Software Engineer

Sep 2022 - Mar 2026

To The New | Noida

- Developed Android applications for fintech and NGO survey clients using Kotlin, Jetpack Compose, Retrofit, and modern Android architecture, improving responsiveness and reducing crash rates by 15%.
- Built secure payment and transaction features covering processing, validation, status tracking, and failure and retry handling.
- Implemented modular, reusable architecture that improved maintainability and reduced development time by 10% across multiple projects.
- Mentored junior developers and collaborated with backend, QA, product, and business teams to deliver scalable mobile solutions.

Senior Software Engineer

May 2021 - Sep 2022

Chetu India Pvt. Ltd. | Noida

- Built and deployed a Mobile POS application with Bluetooth and Wi-Fi device integration for payments and receipt printing, supporting 1,000+ transactions daily.
- Integrated secure Credit Card, Debit Card, UPI, and ACH payment workflows across fintech and retail applications.
- Improved transaction success rates by 10% through optimized workflows, robust error handling, and transaction-state management.
- Reduced API response latency by 10% through RxJava-based asynchronous processing and performance optimization.
-

Senior Android Developer

Apr 2019 - Apr 2021

Binplus Technologies Pvt. Ltd. | Jhansi

- Delivered the Smart Self Study Android application for lectures and learning materials, achieving 10K+ downloads and a 4.5-star Google Play rating.
- Built scalable, user-friendly Android solutions and worked with cross-functional teams to meet project requirements and release timelines.
- Mentored junior developers through code reviews and technical guidance, contributing to a 15% improvement in team productivity.

PROJECT HIGHLIGHTS

NGO Survey Application | Kotlin, Jetpack Compose, Room, Retrofit, Coroutines, Flow

- Developed an offline-first Android survey application that allowed field teams to collect and store data without internet connectivity.
- Implemented local persistence using Room and reliable server synchronization when network connectivity became available.
- Added connectivity monitoring, controlled retries, and synchronization status tracking to handle unstable network conditions.
- Followed MVVM and Clean Architecture to separate UI, business logic, local storage, and networking components.

Mobile POS Application | Kotlin, Java, RxJava, Bluetooth, Wi-Fi, Payment Gateways

- Built and deployed a Mobile POS application supporting more than 1,000 transactions daily across multiple merchants.
- Integrated Bluetooth and Wi-Fi devices for payment processing and receipt printing.
- Implemented secure Credit Card, Debit Card, UPI, and ACH payment workflows with transaction validation and status management.
- Improved transaction success rates by 10% and reduced API response latency through optimized asynchronous processing and error handling.

Fintech Transaction Platform | Kotlin, Jetpack Compose, Retrofit, MVVM

- Developed secure transaction-processing features covering validation, payment initiation, status tracking, failure handling, and controlled retries.
- Implemented reusable UI and domain components using Jetpack Compose, MVVM, and modular architecture.
- Improved application responsiveness and contributed to a 15% reduction in crash rates through performance monitoring and stability improvements.
- Collaborated with backend, QA, product, and business teams to deliver reliable payment features.

Smart Self Study Application | Android, Kotlin, Java, Firebase

- Developed and published an Android education application that provides students with access to lectures and study materials.
- Implemented a scalable and user-friendly interface to simplify content discovery and improve the learning experience.
- Integrated Firebase-backed functionality and optimized the application for different Android devices.
- Achieved 1,000+ downloads and a 4.5-star rating on the Google Play Store.

LEADERSHIP AND DELIVERY

- Mentored junior developers through code reviews, technical guidance, and practical architecture discussions.
- Worked closely with backend, QA, product, and business stakeholders to deliver reliable releases and resolve production issues.

EDUCATION

B.Tech in Computer Science | Bundelkhand Institute of Engineering and Technology, Jhansi | 2016 - 2019 | 64%

Diploma in Information Technology | Government Polytechnic Lucknow, Lucknow | 2012 - 2015 | 67%
